

SecureView "Professional Digital" IP/WebCam Packages (4 Camera - Digital Recorder - Color IP Monitoring System)

Benefits:

Anywhere, anytime, using a simple Internet connection, you can now monitor your company's high sensitivity areas, check outside perimeters, parking lots, selected inside areas, cash register counters, or employee stations, using any one of our visible or "camouflaged" IP-Cameras. Our *SecureView "Professional Digital" IP/WebCam System* also has the ability to monitor and record audio and high quality video 24 hours a day, for up to a month! It can also trigger alarms, sense motion, or record selected events. Our *SecureView "Professional Digital" IP/WebCam System* gives you that much needed security in today's complex business world. Our SecureView System inexpensively increases safety and security, gives you an extra "trusted" set of eyes & ears, offers you peace of mind, and it can do this all while acting as a *safe* - deterrent to inappropriate behavior, theft or crime!

Features

- ♦ Zero image degradation of picture quality. No cleaning needed, maintenance free hard disks, completely "digital", NO need to buy VCR tapes - instant record or playback, NO waiting for fast forward or rewind!
- ♦ Ability to capture "live" events and save to a jpeg file or AVI video clip. Also export digitally signed video over the IP network, and / or save to an external CD-ROM or ZIP Drive via a built-in external SCSI port.
- ♦ Hard disk capacity options of 40, 80, 150 & 320GB hard disk capacities, which now gives up to 1 month of storage at 6pps, 18KB file size on a 16 channel unit. (Equivalent to 24 hour time lapse mode in SVHS)

SecureView "Professional Digital" IP/WebCam Package
